Achievements
Achievements allows instructors to provide opportunities for students to earn acknowledgement for their accomplishments. Instructors will designate the criteria students will need to meet in order to receive the acknowledgement.

Announcements
Announcements are a communication tool an instructor can use to post timely information about the course. When creating an announcement a user can choose the option to send the announcement via email or link to course content.
**Blogs**
A blog is a personal online journal meant to be shared within the course for general access. Blogs include a comment option for users can respond and interact with one another. Blogs are considered a social learning tool encouraging users to share knowledge and materials with one another.

**Calendar**
Use the calendar to post important course dates such as due dates for exams or assignments or meeting times.

**Contacts**
Contacts is an excellent place to provide your information to students along with any other faculty or staff’s contact information they may need.

**Course Messages**
Course Messages are private messages between members of the course and can only be viewed from the course.

**Discussion Board**
Discussion Boards is an asynchronous communication tool used to enhance or replicate discussion that takes place in the traditional classroom. Discussions offer students and faculty convenience and flexibility to communicate with other members of the course.

**Glossary**
Glossary can be useful for providing terms and definitions for a course to members of the course.

**Groups**
Groups will allow students to work together in their own collaborative areas as well as submit assignments as a group.

**Journals**
Journals are a communication tool used between faculty and students that allows students to express their opinions, ideas and concerns.

**My Grades**
My Grades shows students their grades for all items in a course that are gradable and can customize the order they appear.

**Roster**
Roster provides a way for users to see the people enrolled into the course and their email address.

**Send Email**
Send Email is a tool used to communicate with members of the course external to eCampus. Email will use the email address provided through Star, for Faculty and Students it will be their mix email address. Users can send an email to another member’s right from eCampus without having log in to their email client.

**Tasks**
Tasks are used to aid students in prioritizing activities in a course and tracking the status of the activity.

**Wikis**
Wikis is a communication tool used share and collaborate among members of a course. Each course member can add or edit a wiki and provide valuable knowledge.
