Course Navigation

Every page in a course will have the following components to seamlessly navigate a course.

**Global Navigation**
Navigation available throughout the system to access system content.

**Course to Course Navigation**
Allows a user to access and

**Breadcrumbs**
Provides a way to easily access the previous page.

**Course Menu**
The course menu provides the navigation of the course content to be delivered to students.

**Show/Hide Course Menu**
Selecting the show/hide will allow a user to show or hide the entire course menu and control panel.

**Control Panel**
An instructor only option that aids the instructor in teaching and building a course.

**Content Frame**
Displays the content and pages the user is selecting to view.

**Student View**
Selecting this option allows the instructor to view the course as a student and check the settings they have set.

**Edit Mode**
Turning the edit mode off allows the instructor to view the course content without seeing all the options for the items listed on a page thus not being able to edit the content.
