Course Menu Overview

1. **Drag and Drop**
   - Use this option to be able to reorder the course menu by dragging and dropping.

2. **Collapse**
   - Select the space next to the course name and you can make the course menu collapse.

3. **Add Menu Item**
   - By selecting the icon, you can add items such as content, blank and modules pages, and tool, web and course links to the course menu.

4. **Display Course Menu in a Window**
   - Selecting this will allow the user to see a separate window open with the course menu displayed.

5. **Refresh**
   - Refresh will allow the course menu to refresh to ensure all changes have taken place.

6. **Reorder: Menu Items**
   - Reorder menu items by using a keyboard or mouse instead of the drag and drop feature.

7. **Home Button**
   - Selecting the home page button will allow the user to go to the designated course home page.

8. **No Content on a Page**
   - Indicates the course menu item has no content on a page and will not be visible to students.

9. **Hidden Link**
   - Indicates the menu item is not visible to students.

10. **Contextual Menu**
    - The contextual menu allows the user to edit the menu item such as edit, delete and show/hide.
